

Euroa Health Inc. Aged Care Development

In 2012 Euroa Health Inc. was successful in gaining Commonwealth funding for the development and construction of a 75 bed Aged Care facility, adjacent to the current hospital. Conditional to the grant was the stipulation that \$2M would be raised at the local level.

Tumac Consulting Pty Ltd was appointed the Project Manager in 2013. De Nova Group Pty Ltd was selected as the architect. Land has been secured and the project is progressing through the design phase with full documentation expected in December, ready for tendering the building stage in February, 2015.

Euroa Health Inc. commenced a community program in 2013, whereby residents were invited to provide their ongoing support in various ways. Volunteers staff The Bower Bird Boutique. Business interests, community groups and individuals have pledged support in either a financial or general assistance capacity and energy is now being expended to reach the necessary target.

Euroa Health Inc is delighted by the leadership and generosity of the Euroa Rotary Club. Rotarians have accepted the challenge of the community fund raising effort by pledging a minimum of \$40000 over the period 2014-2016.
